4TH ITALIAN CONFERENCE ON ICT FOR SMART CITIES AND COMMUNITIES

CALL FOR ABSTRACTS

A smart city is a vision where key infrastructure components and services – e.g., environmental, emergency response, transport/mobility/energy management - are seamlessly integrated to meet the real and priority needs of its population. Those services have to be therefore context-dependent and support the achievement of city-specific goals. Smart city solutions have to be multi-disciplinary, blending together socio, cultural, and technical aspects altogether. In this context, ICT becomes the means to move from problems to digital solutions.

The conference, at its fourth edition, is an opportunity for people from academia, industries and public institutions to meet and define new collaborations in the perspective of forthcoming national or international project calls. In this respect, it is not intended to disseminate theoretical scientific activities. Instead, its main goal is to present available innovative solutions and active research projects, as well as novel ideas for new project proposals. We expect contributions in all the fields related to ICT-based solutions for smart cities and communities. Potential topics of interest include, but are not limited to, the following application domains:

*E-Health | Food | Smart Energy | Smart Building | Mobility, Transports & Logistics | Climate & Environment Management
E-tourism | E-culture | E-education | E-government | E-inclusion | Urban Security*

For additional information related to specific ICT topics, see the focus groups pages of the [National Lab on Smart Cities and Communities](#).

SUBMISSIONS INSTRUCTIONS

Potential contributors are requested to send an extended abstract that briefly describes the project, or project idea, to be presented. Both active and recently terminated projects can be considered. Novel ideas for new project proposals are also welcome.

Submission is through [EasyChair](#). Extended abstracts must be submitted in PDF, following the IEEE template available [at this link](#), and must not exceed 2 pages in size. When submitting, you are requested to select which of the conference tracks better fits your contribution. Submitted extended abstract will undergo a review process to check their relevance to the conference.

The submission of a contribution implies that, if accepted for presentation, at least one of its proponents must register (paying the requested fee) and attend the conference for giving the presentation.

ORGANIZING COMMITTEE

STEERING COMMITTEE CHAIR

Giuseppe Anastasi - *University of Pisa & CINI*

GENERAL CO-CHAIRS

Henry Muccini - *University of L'Aquila & CINI*

Michele Ruta - *Polytechnic University of Bari & CINI*

PC CHAIR

Enzo Mingozzi - *University of Pisa & CINI*

IMPORTANT DATES

June 4, 2018

Submission deadline

June 23, 2018

Notification

July 3, 2018

Early Registration

September 19 - 21, 2018

Conference Dates
